DRAR REPORTS SEPTEMBER HOUSING STATISTICS

The Durham Region Association of REALTORS® (DRAR) President Meredith Kennedy reported 662 residential transactions in September, representing a 17.8 percent decrease when compared to the same time last month. Although Durham Region saw fewer new listings in September, listings in October are steadily increasing. Durham Region is experiencing a balanced market when compared to last year. Sales in Durham Region decreased compared to this time last year, but it is important to note that the average selling price is only down 0.5 percent. This is encouraging for Durham Region as it remains a desirable location.

On a year-over-year basis the average selling price only decreased by 5.4 percent reaching \$915,027 in September. When comparing the average selling price in Durham Region to this time last month, the average price decreased slightly. Durham Region continues to be a popular marketplace for buyers and has not been experiencing the projected substantial price decreases.

“The average days on market (DOM) reported in September was 18, double the days on market reported this time last year when the average was 9,” said Kennedy. “An increase to the days on market is an advantage to both buyers and sellers as well as their REALTORS®. Real estate transactions are one the largest transactions for individuals and having time during the process for REALTORS® to do their due diligence is imperative for a smooth transaction. An increase to the days on market allows for important steps, such as time for arranging home inspections and financing.”

All candidates running in the upcoming municipal elections must ensure that homeownership is a key priority. High borrowing costs are not the only factor impacting home buyers’ ability to enter the market. Supply issues are also having a direct impact on inventory and housing options.

“We encourage everyone to vote on Monday, October 24th, as it is important to remember that municipal council decisions directly impact housing, development, approvals and other policies,” stated DRAR CEO Wendy Giroux. “We are calling on all candidates to keep housing a top priority and bring forward policies that will address these issues so that there are adequate housing options in the future.”

DRAR is proud to announce that REALTOR® members raised over \$10,000 at the Annual Charity Golf Tournament in support of The Super Sophia Project. REALTORS® are deeply connected to the communities where they work and serve and are committed to giving back by supporting DRAR’s Charities of Choice each year.

Overview

The Durham MLS® Statistics provided are compiled by the Durham Region Association of REALTORS® and are based on total home sales. The statistics reflect selling prices for various property types within the Durham Region. These statistics are for informational purposes only.

TA	Total Active (at the end of the last day of the month)
YTD	Year to Date (accumulation of new data to date)
PYTD	Previous Year to Date (accumulation of new data to date for previous year)
%+/-	Year Over Year Percentage Differential
Avg. DOM	Average number of days on the market for firm transactions between the first & last days of the month
Avg. SP/LP	Ratio of the average selling price to the average listing price for firm transactions between the first & last days of the month
MOI	Months of Inventory (how long in months it would take to completely sell the average number of active listings). Calculated using a 12 month moving average (active listings/sales)

Notes:
1. Sales, dollar volume, average sale prices and median sale prices are based on firm transactions into the MLS® system between the first and last day of the month/period being reported.
2. Average Price is calculated by dividing the dollar volume by the number of sales.
3. Median represents the middle number in the ranking of homes sold from lowest to highest price.
4. As of July 2011 Durham Region statistics figures include the municipalities of Uxbridge and Brock.
5. Due to changes to service areas, caution should be exercised when making historical comparisons.
6. Past monthly and Year-to-Date figures are revised on a monthly basis.
7. All statistical information obtained from the Toronto Real Estate Board's Market Watch.
8. SNLR is Sales to New Listing Ratio (Below 40% is Buyer's Market, 40%-60% is Balanced market, Above 60% is Sellers Market)

Durham Sales Monthly with Five Previous Years for Comparison

NOTES

Sales, dollar volume, average sale prices and median prices are based on firm transactions into the MLS® System between the first and last day of the month/period being reported. Average price is calculated by dividing the dollar volume by the number of sales. Median represents the middle number in the ranking of homes sold from lowest to highest price. As of July 2011 Durham Region statistics figures include the municipalities of Uxbridge and Brock. Due to changes to service areas, caution should be exercised when making historical comparisons. Past monthly and Year-to-Date figures are revised on a monthly basis. All statistical information obtained from the Toronto Real Estate Board's Market Watch. Mos. Inv. is Months of Inventory (how long in months it would take to completely sell the average number of active listings). Calculated using a 12 month moving average (active listings/sales).
